Mitchell Congratulates 2018 mPower Award Winners

October 2, 2018
5 MIN READ

Celebrating customers for delivering an excellent customer experience through business innovations

SAN DIEGO, CA (October 4, 2018) — [Mitchell International](#), a leading provider of technology, connectivity and information solutions to the [Property & Casualty](#) (P&C) insurance and [Collision Repair](#) industries, held its annual Property and Casualty Conference October 1-3, 2018 near Palm Springs, CA. During the gathering of experts in auto physical damage, auto casualty and workers' compensation insurance claims, Mitchell's president and CEO Alex Sun announced the winners of the second annual Mitchell mPower Awards. The program celebrates customers who are delivering better outcomes through innovative technology or business transformations. Congratulations to WCF Insurance and Property Damage Appraisers for their outstanding efforts this year.

WCF Insurance Proves that Doing the Right Thing is Good for Business

As Utah's premier workers' compensation insurance provider, WCF Insurance has been protecting both workers and employers for more than 100 years. Like many states across the U.S., addiction to prescription painkillers has reached epidemic proportions in Utah. With a commitment to finding a way to impact the crisis affecting its community, WCF developed a program to get the right medication to the right people, for the right situation resulting in less opportunity for individuals to begin a path to tolerance, addiction, or abuse. To ensure a successful adoption, they conducted extensive outreach to the medical community. After implementation of its Pharmacy Partnership Program, WCF experienced a 51 percent decrease in the total quantity of opioid pills dispensed—the implied equivalent of more than a 41,000 opioid pills reduction from the prior year. That is 41,000 fewer opportunities for individuals to begin an unintended path to tolerance or addiction. Moreover, because of their outreach, WCF programs have significantly impacted a broader network of health partners who have followed WCF's lead by adopting its protocols.

Property Damage Appraisers Gets Customers Back to Their Lives Faster by Helping Clients Deliver on Their Promises

Clients turn to Property Damage Appraisers (PDA) and its national team of 650+ appraisers to assist when they have more work than they can manage or need a local appraiser. Because these appraisers are often the only representative from the carrier that the customer will meet, PDA wants to ensure that it delivers a consistent experience across its entire network. Knowing that cycle time dramatically affects customer satisfaction as well as the cost of the claim, PDA set its sights on a cycle time of less than two-days, outpacing the industry's five-day cycle time. To achieve this goal, PDA overhauled its existing workflow, implemented several new tools and methods such as a proprietary photo application, more robust file-tracking, and streamlined resource assignments. Implementing these technology and service advancements was a massive undertaking as it required significant training and change management across 250 franchise offices. PDA reports that since implementation in 2016, cycle times have consistently declined each month. In September 2018, cycle times for auto-related claims were an industry-leading average of 1.54 business days. PDA continues strengthening the industry by improving the claims experience by offering Same-Day Service for both the customer and the carrier.
