Charged for Success: Understanding EV Trends and Their Impact

June 29, 2022
1 MIN READ

Sales of electric vehicles (EVs) grew by 85 percent in 2021 while sales of light-duty vehicles increased by just 3 percent over the same period. As more consumers embrace EVs and more automakers promise an all-electric line-up, insurers and repairers must prepare for dramatic changes to the way they manage collision claims.

In this CIECAST webinar, Mitchell's Ryan Mandell, director of claims performance, describes the:

- Market factors driving EV adoption
- Effect of EV sales on claim frequency and costs
- Differences in EV construction and technology
- Challenges EVs introduce to the delivery of proper, safe repair
- Technology enhancements needed to support the safe return of EVs to the road
