July/August 2023 Kontos Commentary

The following commentary is produced by Tom Kontos, Chief Economist, ADESA Auctions.¹

Summary

Average wholesale prices declined for the third month in July, although at a slightly more gradual rate than in June. Prices have so far stabilized in August and remain up by around 30% versus pre-pandemic.

Retail used vehicle sales remain soft, but Certified Pre-Owned (CPO) sales are a bright spot. Both trends reflect consumer concerns about vehicle affordability. In the case of overall used vehicle sales, consumers are pushing back on still-high used vehicle prices and abstaining from purchasing altogether; in the case of CPO sales, consumers are pushing back on still-high new vehicle prices and purchasing used vehicles instead.

Wholesale Market Trends*

According to ADESA US Analytical Services' monthly analysis of auction industry used vehicle prices by vehicle model class, wholesale prices in July averaged \$14,473—down 4.7% compared to [June](#), down 11.9% relative to July 2022, and up 26.7% versus pre-pandemic/July 2019, as seen below.

Retail used vehicle sales continue to be soft and down on a year-over-year basis. CPO sales are a bright spot, as consumers seek more affordable alternatives to new vehicles, although the uptick is in part due to recent expansion of some manufacturers' CPO programs to include a wider range of age and mileage.

***Source:** Analysis in this section is based on over six million annual sales transactions from over 250 of the largest U.S. wholesale auto auctions, including those of ADESA US as well as other auction companies. ADESA US Analytical Services segregates these transactions to study trends by vehicle model class, sale type, model year, etc.
